CROWNS OF LATIN AMERICA

*1	ARGENTINA - Provincias del Rio de la Plata 8 Reales 1813 J Elizondo 1, Craig 15. With the exception of a couple of extremely crude base metal issues in Mexico, this crown is the first struck by the Republicans. As the first professionally prepared crown of Independent Latin America, it is a very historical and important issue. Since it also happens to be unusually attractive, it has always been one of our favorite issues. It would seem that almost every collection of Republican Latin American coins should include this type as a symbol of the birth of non-colonial coinage. AVF $70.00; EF or nearly so, some crudeness.	200.00
2	-8 Reales 1813 J, similar to the above but struck in copper in 1913 on the Centennial of Independence. AU-UNC, nearly full red	25.00
3	-8 Reales 1815 F E5, C15. AVF, toned, small scratch	75.00

*118 -1 Peso 1834 I E96, C86. On our list #32, we discussed this interesting emission at some length. This date has always been a bit confusing since there are two assayers (I and IJ) and the assayer IJ pieces usually (always?) come with a Philippines counterstamp. Since many dealers habitually fail to list the assayer of these coins when they are available, research problems are many. After a lengthy discussion with a collector who is genuinely concerned with this particular date, we have decided that the 1834 IJ is probably always encountered with a Philippines counterstamp and the 1834 I is never found with the counterstamp. It was also decided that seven pieces of the 1834 I have been reported including those known in collections in Chile itself. We have reported this new information with the desire to fully inform any prospective client of the exact rarity of our **FINEST KNOWN** specimen. Prooflike nearly UNC, Superb 1500.00

*136 COSTA RICA 8 Reales 1831 E E1, C5. EXTREMELY RARE ASSAYER - One of the RAREST of all modern world crowns with only four known specimens after years of search. In 1831, this Central American nation struck its first silver coinage. Three denominations were issued: 1/2 Real, 1 Real and the crown-size 8 Reales. Two different assayers were involved with the coinage; one used the initial "F" and the other identified his product with the initial "E". It has not yet been possible for us to determine if these men worked concurrently or successively. From the gold coinage we can determine that assayer F was working in 1828 (1/2, 1, 2, 4 and 8 Escudos), 1833 (8 Escudos) and 1835 (2 and 4 Escudos). We also know that assayer E is known on issues of 1833 (1 Escudo) and 1837 (4 Escudos). Understanding this overlapping cannot be aided by consideration of silver coinage assayer initials as none were struck with dates of 1832 through 1841.

We do know that all three assayer E issues of the 1831 silver denominations do exist and all are scarcer than the similar assayer "F" emissions. The assayer "E" 8 Reales was never offered (as such) in any of the classic auction sales or price lists that we have in our library dating from before 1973. However, Gurdian listed this issue in the early 1950's which indicates that he believed it did exist. When Elizondo issued his catalogue, the coin was included but not pictured. Then in March 1973, we had the opportunity to obtain a specimen from one of the best crown collections ever assembled. We sold that piece to Almanzar's who offered it in his June 1973 auction; he described that nice EF specimen as "one of the Kings of the Latin American 8 Reales and Pesos series" - a title we feel it deserved. It realized $3400. Then in September 1974, Almanzar offered another specimen from an advanced South American collection in VF/EF condition and sold it for $3200.

During our fifteen visits to Costa Rica, we have seen many rare and interesting coins but we have never spoken to anyone there who could show us an 1831 E 8 Reales. Although the national collection might contain a specimen, none could be located upon our specific request. We do not doubt that one or two of the great collections in Costa Rica include this issue but it is significant that we could not locate even one specimen after much inquiry there.

The scarce (but not rare) 1831 F eight reales brings about $750 in VF-EF and $2000 - $2500 in superb almost uncirculated condition. Since the last auction record for an assayer E was four times the assayer F value in VF-EF, it could be argued that a choice A. UNC would be worth four times $2000 - $2500. Such would not allow for the fact that a high grade assayer F specimen constitutes a rare and desirable type coin and thereby commands a premium as such. On the other hand, as an extremely rare and highly desirable coin, a superb 1831 E should be among the most valuable of Latin American Republic crowns. That price range extends to about $15,000. The ultimate purchaser of this coin will help us determine its value within this range.

This specimen is decidedly the FINEST KNOWN, grading a full and important step above the piece we sold to Almanzar which was then resold in 1973. It is ALMOST UNCIRCULATED and exhibits only cabinet friction obtained during its lengthy residence in a fabulous European collection. The surfaces are mostly PROOFLIKE, the edges are flawless and well-defined, and the strike is full. It is the best Costa Rica 1831 crown we have ever seen - better than any 1831 F known to us. Rare, Superb and probably the most prized coin we have ever owned. Serious collectors are invited to correspond. . . . . .Price on Request

WE ARE PLEASED TO OFFER THIS SELECTION OF BANK NOTES from the Paper Money Portfolio of Freeman Craig & Company.

For those of you who do not collect Latin American coinage and therefore do not know us, let us introduce ourselves. We are primarily specialized dealers in all Latin American gold, silver and copper coinage. We travel extensively through most of South and Central America in pursuit of numismatic items. While our interest in paper money began about four years ago, it is only recently that we have begun offering our stock for sale. Our first accumulation of better notes was sold intact to one of the largest dealerships in foreign currency in the world; it was then offered by them in a deluxe catalogue. Since that time, we have invested about $25,000.00 in new acquisitions which now comprise our present stock.

We have modified our original plans to issue a larger, more comprehensive volume at this time; we now plan to do so early next year. In the meantime, we can make portions of our stock available to our clients in limited edition price lists such as this one.

This is our second list of this type; it will be sent to only 500 of the 2400 collectors on our mailing list. This limited mailing was necessary since we do not know which of the collectors on our mailing list are serious buyers of Latin American issues and we did not want to incur the cost of sending a copy to each party. So if you know of a fellow collector whose interest lies in this field, please pass this list along when you are through with it. Also, if you do not order from this list but wish to receive later lists, please let us know you are interested, as we will continue to send these lists to a different group of collectors each time. To insure that you receive the offerings of material in your particular areas of interest, let us know what they are.
